

BLUE TEAM SERVICE

The Blue Team is an integral part of any cybersecurity strategy, representing the defensive line of your organization's cybersecurity efforts. We take on the role of defenders, analyzing, detecting, and responding to real-time threats.

Our primary goal is to prevent, detect, and mitigate potential security breaches and incidents. Our expertise follows ISO27001 and are well-equipped with latest cyber security certificates.

WHAT ARE THE BENEFITS?

- **Tailored solution and Cost-effectiveness:** By outsourcing your Blue Team services to Cypro, you gain access to a team of skilled professionals without the overhead expenses.
- **24/7 Monitoring and Support:** A round-the-clock monitoring and support, ensuring that your organization remains protected even during off-hours and holidays.
- **Enhanced Cybersecurity Posture:** Our experts stay vigilant, continuously monitoring your network, applications, and systems.
- **Proactive Threat Detection:** Our Blue Team employs cutting-edge threat detection tools and technologies.
- **Rapid Incident Response:** Our swift incident response ensures that any breach or compromise is isolated and contained.
- **Compliance and Regulation Adherence:** Cypro's Blue Team stays up-to-date with the latest cybersecurity standards, regulations, and industry best practices.

FOCUS AREAS

Equipped with in-depth knowledge of harmful tactics, techniques, and procedures, our Blue Team modifies and regroups defense measures to enhance your security systems.

PROTECT

- Asset Management
- Vulnerability Management
- Threat Hunting
- Continuous Monitoring

RESPONSE

- Incident Response

RECOVERY

- Digital Forensics

Our Blue Team at Cypro is a group of seasoned cybersecurity professionals, ready 24/7 to protect your organization from potential cyber threats.

They constantly monitor and strengthen every aspect of your security infrastructure, staying one step ahead of attackers.

Equipped with in-depth knowledge of harmful tactics, techniques, and procedures, our Blue Team modifies and regroups defense measures to enhance your security systems.

ABOUT US

Cypro AB will help you to comply with directives as NIS2 and standards as ISO 27001 with the mission to stay compliant and secure over time. Our top-tier global security assessment team includes experts specializing in red teaming and information security offers unparalleled insight into potential vulnerabilities.

A state-of-the-art Security Operations Center (SOC) enables us to deliver the highest level of security services, actively monitoring and responding to possible threats.

METHODOLOGY

MITRE ATT&CK® is a worldwide resource of adversary tactics and techniques derived from real-world data. It forms the basis for crafting threat models and methodologies in various sectors, including private, government, and cybersecurity industries.

Developed by Lockheed Martin, the Cyber Kill Chain® framework is part of the Intelligence Driven Defense® model for identification and prevention of cyber intrusions activity. The model identifies what the adversaries must complete in order to achieve their objective.

*NIST Incident Response Life Cycle
NIST publication 800-61*

WHAT YOU'LL RECEIVE

Threat Intelligence

Offers knowledge about potential threats and attack vectors specific to an organization which enables security teams to take early defensive actions before an incident occurs.

Asset Management

Gives knowledge about what the environment that needs to be protected to ensure security throughout the asset lifecycle and to help prioritize protection measures.

Threat Hunting

Detection of incidents that has gone unnoticed by current detection rules which allows for better detection in the future and a stop to ongoing incidents.

Continuous Monitoring

Provides a real-time view of the environment which allows for prompt detection of malicious usage in the systems before major damage is done.

Incident Response

Ensures rapid containment and eradication of incidents, reducing potential damage and to enhance the future defensive mechanisms.

Digital Forensics

Helps to determine what has happened, how it happened, and when it happened during an incident. Contains gathering of digital evidence for legal or disciplinary actions.

READY TO BOOST YOUR CYBER SECURITY

Start by reaching out to your trusted Cypro customer contact or connecting with our experienced experts. Together, we embark on a transformative path to fortify your defenses, ensuring your valuable assets remain safe from harm.
